Explore Hikari--France's first Positive Energy Building designed by Kengo Kuma & Associates, featuring custom crystalline PV glass panels.

For this building, Sadev provided nearly 1500 rotules to maintain the solar glass panel. As the project required an installation from the outside, the R1008 were chosen to simplify the ...

For this building, Sadev provided nearly 1 500 rotules to maintain the photovoltaic panels. As the project required an installation from the outside, the R1008 were chosen to simplify the ...

Solar power panels are located on the MINAMI's building south facade, in order to benefit from the seasonal light energy. For this building, Sadev ...

Lyon Airport Solar PV Park is a roof-mounted solar project which is planned over 14 hectares. The project is expected to generate 24,000MWh electricity to offset 1,600t of carbon dioxide ...

The Hikari project (Light in Japanese) remains the first positive energy building (PBE) in France, combining offices, shops and housing. It is designed by Japanese architect Kengo Kuma. ...

France, Lyon - Hikari project : For this building, Sadev provided nearly 1500 rotules to maintain the solar glass panel.

A good place to witness large-scale solar use is Lyon, 400km south of Paris. I visited on a typical summer's day in the new climate: 30C, with blazing sunshine.

The first positive-energy mixed-use city block in Europe, delivers exemplary environmental performance since it generates slightly more energy than it consumes. The energy used by its ...

Summary: Discover how Lyon-based photovoltaic glass manufacturers are reshaping sustainable architecture and energy efficiency. Explore cutting-edge technologies, industry trends, and ...

Solar power panels are located on the MINAMI's building south facade, in order to benefit from the seasonal light energy. For this building, Sadev provided nearly 1500 modules to maintain the ...
