Should you go solar in Georgia?

For Georgia homeowners, the decision to go solar is supported by a solid combination of federal and state incentives that make the investment more affordable. While Georgia's incentive landscape is more streamlined than other states, the available programs can still significantly reduce your costs and boost your long-term savings.

How much does solar cost in Georgia?

Environmental benefits: Potential to reduce your carbon emissions significantly. Going solar in Georgia now averages about \$3.52 per watt. That means you can expect to pay roughly \$3,519 per kilowatt (kW) of installed capacity before incentives. For example, a 5 kW system typically costs around \$18,050 before applying the 30% federal tax credit.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

Does Georgia Power offer solar?

From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer.
