Our AI-powered Mosaic bidding software maximizes the ROI of renewable and battery-based energy storage assets and portfolios.

In this paper, a learning-based joint bidding framework is proposed to maximise the aggregated profit of PV-ESS plants.

In this study, we propose an optimal procurement auction scheme for PV long-term contracts using the two-dimensional auction model in which the energy buyer makes contracts ...

In November, a number of central enterprises launched the centralized procurement of energy storage systems/battery cells/frames for 2025.

evaluating the bidding price and capacity may result in an insufficient procurement of PV energy. Therefore, we design a two-dimensional auction scheme, in which bidders report their ...

Photovoltaic (PV) and battery energy storage systems (BESSs) are key components in the energy market and crucial contributors to carbon emission reduction target

Access the definitive 2026 guide for corporate photovoltaic and energy storage procurement. Learn strategic frameworks to avoid common financial and technical pitfalls while ...

Consider this your cheat sheet for 2025's hybrid projects - where solar panels flirt with battery storage systems, and only the savviest bidders get second dates with utility clients.
