As you know, matlab deals mainly with matrices. So, the size function gives you the dimension of a matrix depending on how you use it. For example: 1. If you say `size(A)`, it will give you a ...

In this case, depending upon what your use case is, you might be better off using `int` (or `long long`) for `s1` and `s2`. There are some functions in C/POSIX that could/should use `size_t`, but don't ...

In several C++ examples I see a use of the type `size_t` where I would have used a simple `int`. What's the difference, and why `size_t` should be better?

What is the command to find the size of all the databases? I am able to find the size of a specific database by using following command: `select ...`

If the size of the `int` is that important one can use `int16_t`, `int32_t` and `int64_t` (need the `iostream` include for that if I remember correctly). What's nice about this that `int64_t` should not have ...

`typedef size_t intc; // (instead of unsigned int) typedef ssize_t uintc; // (instead of int)` Because `strlen`, `string`, `vector`... all use `size_t`, so I usually use `size_t`. And I only use `ssize_t` when it may ...

Is there any way to check file size before uploading it using JavaScript?

The approach basically builds on other work where people experimentally identified the size of primitives and typical Java objects and then apply that knowledge to a ...

I'm trying to write a script that will calculate a directory size and if the size is less than 10GB, and greater then 2GB do some action. Where do I need to mention my folder name? # 10GB SIZE="
