UAE-based Global South Utilities inaugurated a 53-megawatt solar project in Yemen to power 330,000 households, significantly enhancing local electricity access. ...

Solar is not only a reliable source of electricity but is also less susceptible to disruptions caused by conflict. The completion of this 6.5 MW project underscores the growing ...

Solar-powered 5G infrastructure combines photovoltaic solar panels with fifth-generation wireless telecommunications equipment to ...

Yemen's recent launch of the solar microgrid pilot in Aden is a significant step forward in the nation's energy transformation. While the challenges of infrastructure and ...

Yemen, widely regarded as the Middle East's least electrified nation, is now benefiting from its first large-scale solar plant, which is helping restore power to tens of ...

UNDP has established a hybrid mini-grid plant project in Ash Shamayatain, Taiz Governorate, combining solar and wind power to provide reliable and clean energy to remote ...

However, as alternatives have been unavailable, the country has turned to decentralised solar energy, giving rise to an unprecedented deployment of solar (home) systems. This report uses ...

UNDP has established a hybrid mini-grid plant project in Ash Shamayatain, Taiz Governorate, combining solar and wind power to ...

Local Yemeni government officials described the project as more than just an energy solution. They noted that
